DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims **1-8** are rejected under 35 U.S.C. 102(b) as being anticipated by Hummel (USPN 5,279,945).

Hummel discloses a method for enzymatic determination of aspartic acid that comprises: reacting aspartic acid (water sample) with nicotinamide adenine dinucleotide phosphate (NADP) in the presence of a cell extract which catalyzes the NADP+ to produce an aspartic reaction product, NH_4^+ , and NADPH (col. 3, lines 4-40). The NADPH produced in the enzymatic reaction is determined in particular by fluorimetry (col. 4, lines 24-29; col. 5, lines 65-68) and is used as a measure of the aspartame concentration in the sample. The pH and concentration of the reaction are listed in example 3 (col.8, line 43-col. 9, line 6). The ppm of aspartame can be produced by simple calculation (claims 1-12; col. 1, lines 15-43).
